Transition Seamlessly From Azure Lab Services To CloudLabs VM Labs

Why CloudLabs VM Labs

CloudLabs VM Labs is a fully managed service that lets you provide users access to preconfigured virtual machines customized to your needs. Whether for classroom training, professional training, hackathons, or hosting hands-on labs at any scale. With CloudLabs VM Labs, you just need to define your ideal lab experience for users, and we'll manage the rest.

Everything you love about Azure Lab Services is available with us!

- **Self-Service:** Simple to use interface to setup and distribute your labs in a complete self-service fashion.
- **Cost-Efficient:** Benefit from our cost-efficient solutions with a transparent pricing model, allowing you to optimize your resources without hidden fees.
- **Customizable Solutions:** Tailored to your specific requirements, our fully flexible and customizable solutions are designed to meet your unique needs.
- **Premium Support:** Experience 24*7 premium quality support from our dedicated team, ensuring a seamless experience at every step.
- **Global Sovereignty:** Select your preferred data residency region with CloudLabs, ensuring compliance and control over the location of your VMs.

Azure Subscription Options

CloudLabs Managed Subscription

Prefer a hassle-free experience? opt for our managed subscription option, dedicated to each CloudLabs tenant. This option is default and recommended for CloudLabs VM Labs customers, with billing based on actual Azure consumption.

Bring Your Own Subscription

Prefer to use your own Azure subscription? No problem. With CloudLabs, you have the option to bring your own Azure account for your preference.

Key Capabilities of CloudLabs VM Labs

1. **Customizable Windows & Linux VMs**
   Deploy labs within minutes for Windows and Linux Operating System customized to your exact requirements.
2. **Direct Web Connect**
   Access the virtual machines through web browser, without the need of any additional software installation.
3. **Shadow VM**
   Instructors and administrators can connect to users' virtual machine using Shadow VM and provide real-time oversight and support.
4. **Simple User Experience**
   Invite users via email or redeemable codes. Once signed in, users can immediately access virtual labs without additional cloud requirements.
5. **Advanced Cost Optimization Features**
   Easily track and limit lab usage, schedule lab's operational hours, and automate VM shutdown for idle labs for cost control.
6. **Multi-lingual Support**
   Access support and localization services in English, Espanol, Francés, Deutsch, Italiano, etc.
7. **LTI Integration**
   CloudLabs integrates seamlessly with various LMS systems like Moodle and Canvas using LTI 1.1 and 1.3, enabling effective communication between the CloudLabs VM labs portal and these platforms.
8. **Integrated Lab Manual**
   Provide detailed lab guides with step-by-step instructions, integrated within the virtual machines for seamless, guided learning.

Migrate to CloudLabs VM Labs

Migrating to CloudLabs VM Labs is simple and easy. Our labs are versatile, suitable for organizations of all sizes, and designed to meet educational and training needs. We provide flexible pricing, customized to your specific requirements.
